A Stitch in Time

SUN-Thing To Think About

The sun's UVA rays are proven to cause signs of premature aging such as facial lines and wrinkles, irregular pigmentation and potentially *more serious skin conditions* such as skin cancer. UVA rays penetrate windows, reflect off the ground, snow and water and are present on cloudy days as well as sunny days. The SPF of a sunscreen deals only with UVB rays and the "burn factor." SkinCeuticals sunscreens contain state-of-the-art transparent zinc oxide, providing *the most UVA and UVB* protection.

SkinCeuticals sunscreens are all PABA-free, oil-free and fragrance free:

Daily Sun Defense SPF 20: Ideal for all skin types, recommended for daily use

Ultimate UV Defense SPF 30: Better for daily use during the summer months

Physical UV Defense SPF 30: Ideal for sensitive or traumatized skin, also contains non-irritating titanium dioxide for added protection

Sport UV Defense SPF 45: Waterproof and sweatproof for the active or outdoor person

**Save 20% off all
SkinCeuticals
sunscreens in July
and August**

PREVENT & PROTECT

Now through August 31st, a portion of all SkinCeuticals sunscreen sales will be donated to The Skin Cancer Foundation.

Melanoma Facts:

* Melanoma is the deadliest form of skin cancer and the incidence is rising faster than any other cancer

* One person dies every hour from skin cancer, primarily melanoma

* Survival rate for those with early detection is about 99%
